1. Power Query steps

Group 1 | Adventure Works Retail | 2013 Online Sales, Targets and Customer Value

Sources connected, RangeStart/RangeEnd parameters, filters, type changes and merges visible in Applied Steps.

FactInternetSales: Source, Navigation, Removed Other Columns, Filtered Rows (date range and territory), Changed Type. All 14 queries listed.

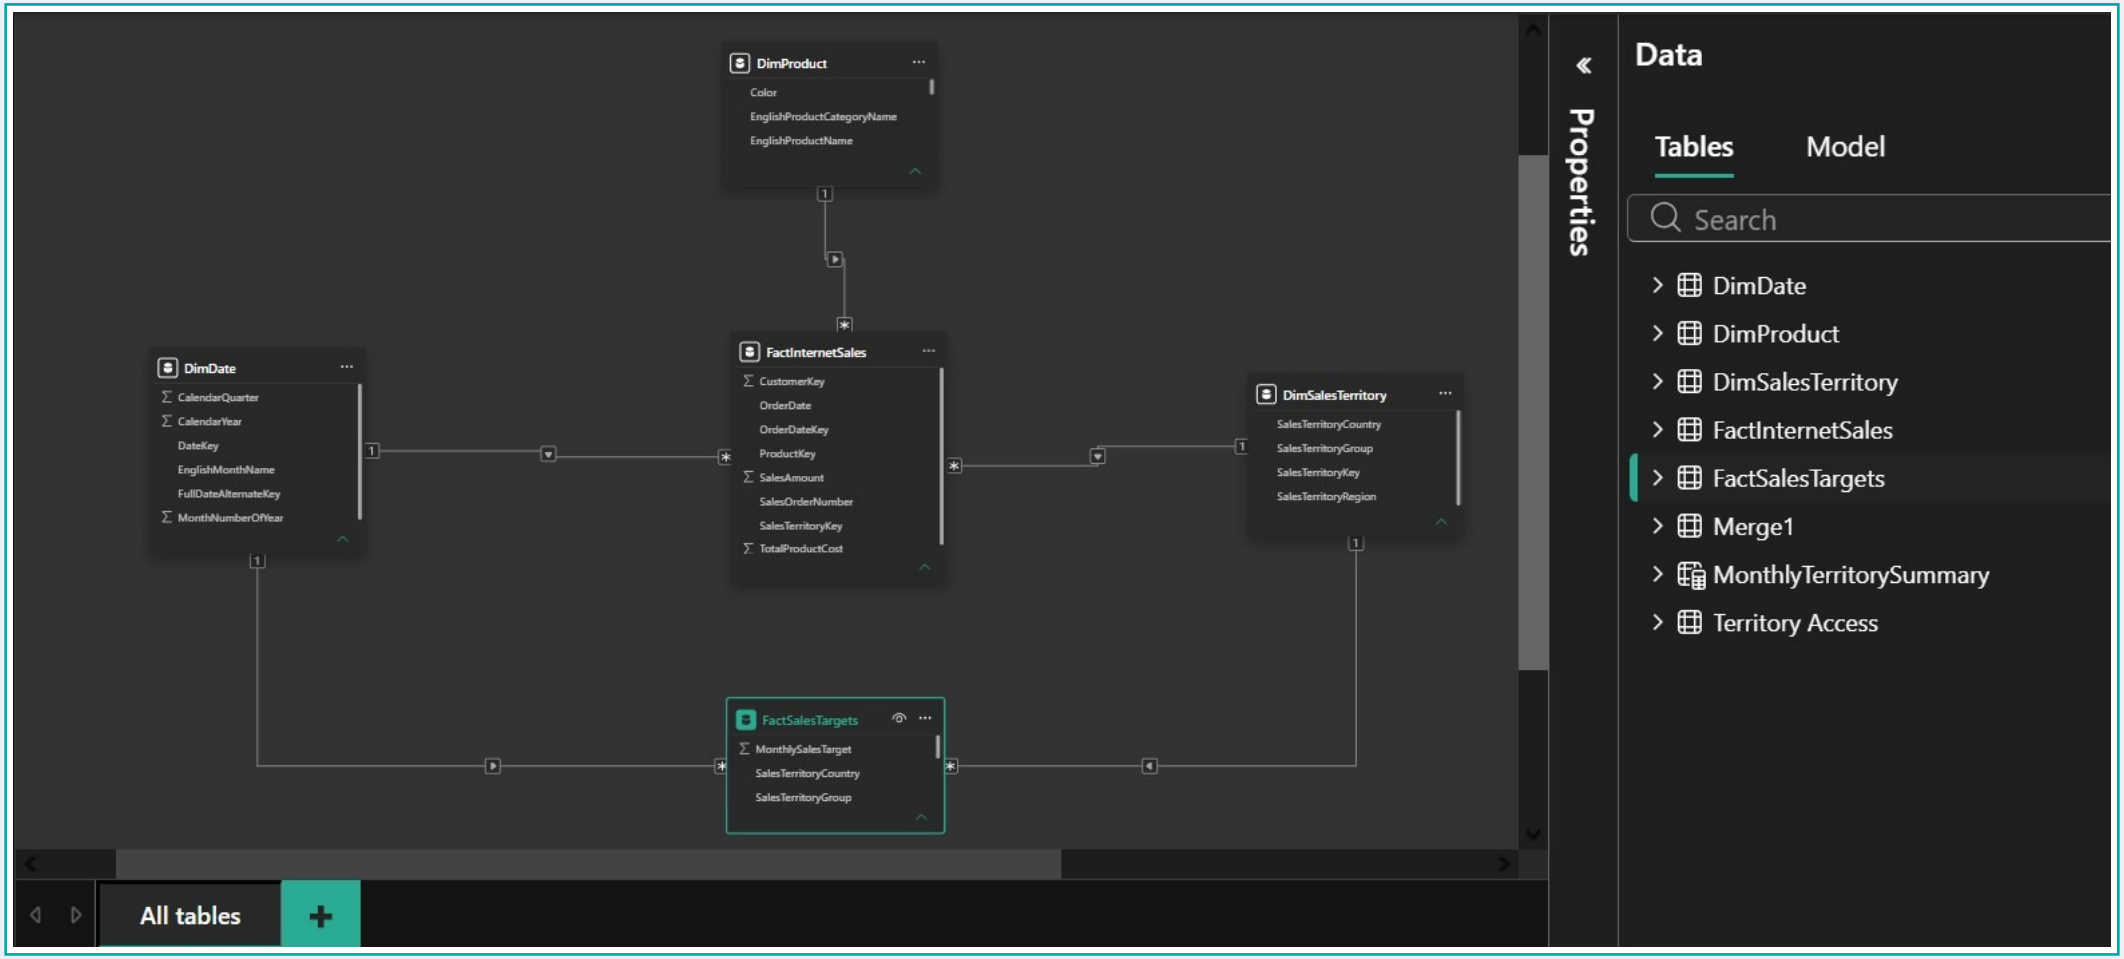

DimProduct: Merged Queries with DimProductSubCategory and DimProductCategory, expansions, Removed Columns.

2. Model view

Group 1 | Adventure Works Retail | 2013 Online Sales, Targets and Customer Value

Star schema: DimDate, DimProduct and DimSalesTerritory filter FactInternetSales and FactSalesTargets. No fact-to-fact relationship; Territory Access is disconnected.

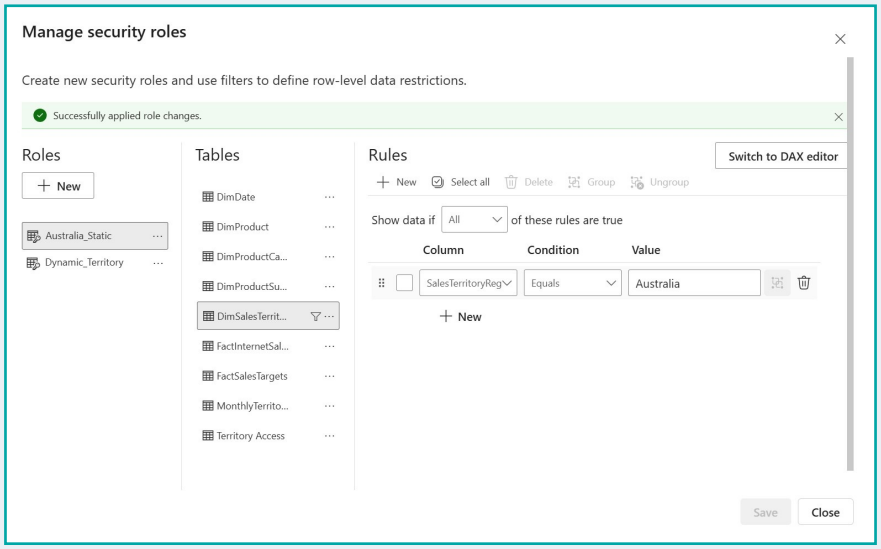

Model view, all tables.

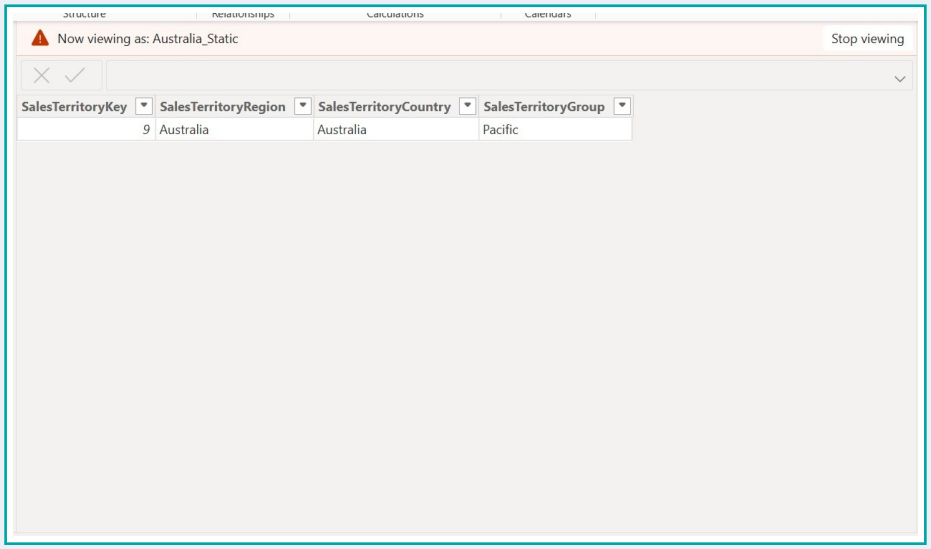

3. Row-level security: Australia_Static

Group 1 | Adventure Works Retail | 2013 Online Sales, Targets and Customer Value

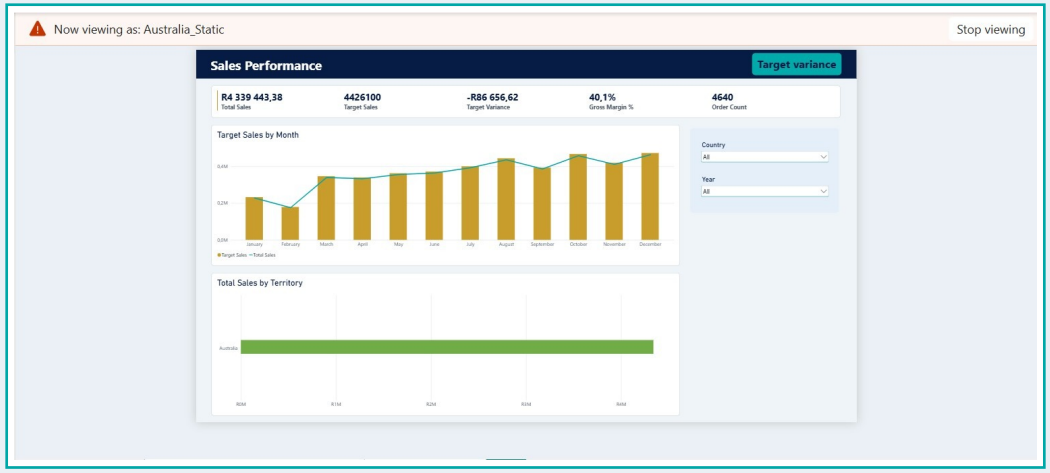

Role definition and View as test.

Manage security roles: Australia_Static filters SalesTerritoryRegion = Australia; Dynamic_Territory also created.

View as Australia_Static: DimSalesTerritory returns only Australia (Key 9).

View as Australia_Static on the report: only Australia is visible.

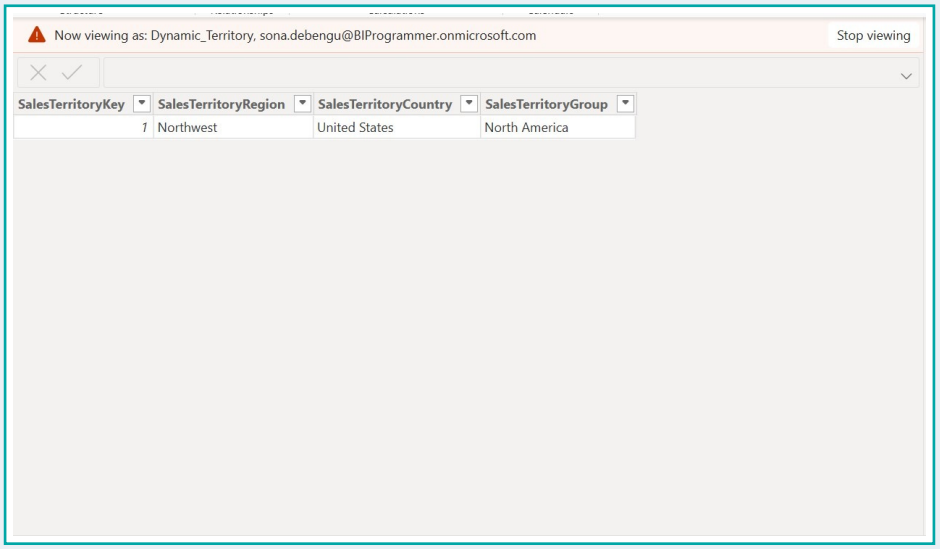

Result

Australia_Static restricts DimSalesTerritory to Australia only.
Both the table and the report show Australia (Key 9) alone.

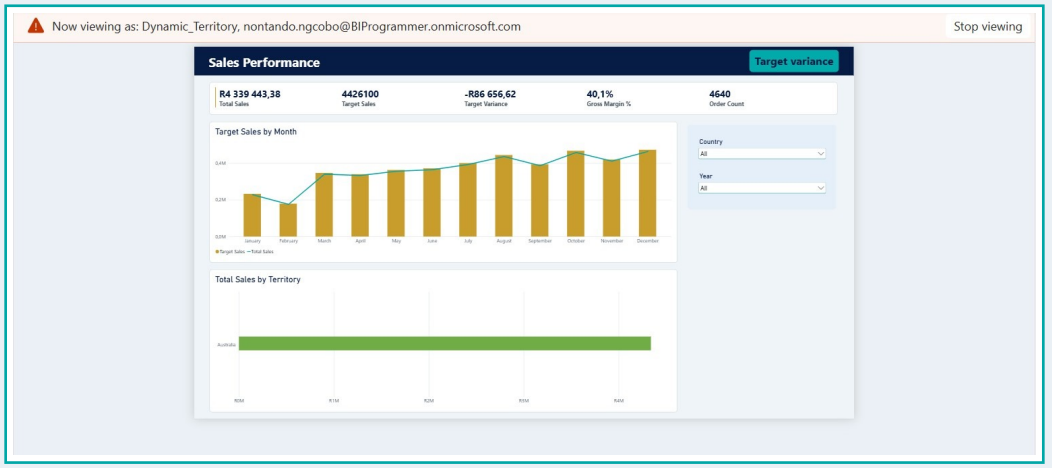

4. Row-level security: Dynamic_Territory

Group 1 | Adventure Works Retail | 2013 Online Sales, Targets and Customer Value

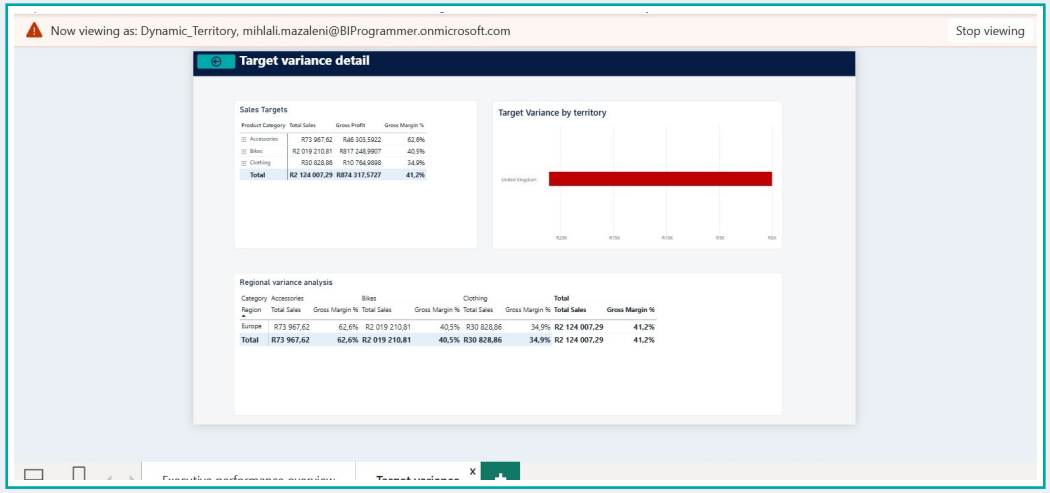

View as tests with three listed UPNs; the visible territory changes with the user.

sona.debengu: Northwest (Key 1).

nontando.ngcobo: Australia (Key 9), Executive page.

mihlali.mazaleni: United Kingdom (Key 10), Target variance page.

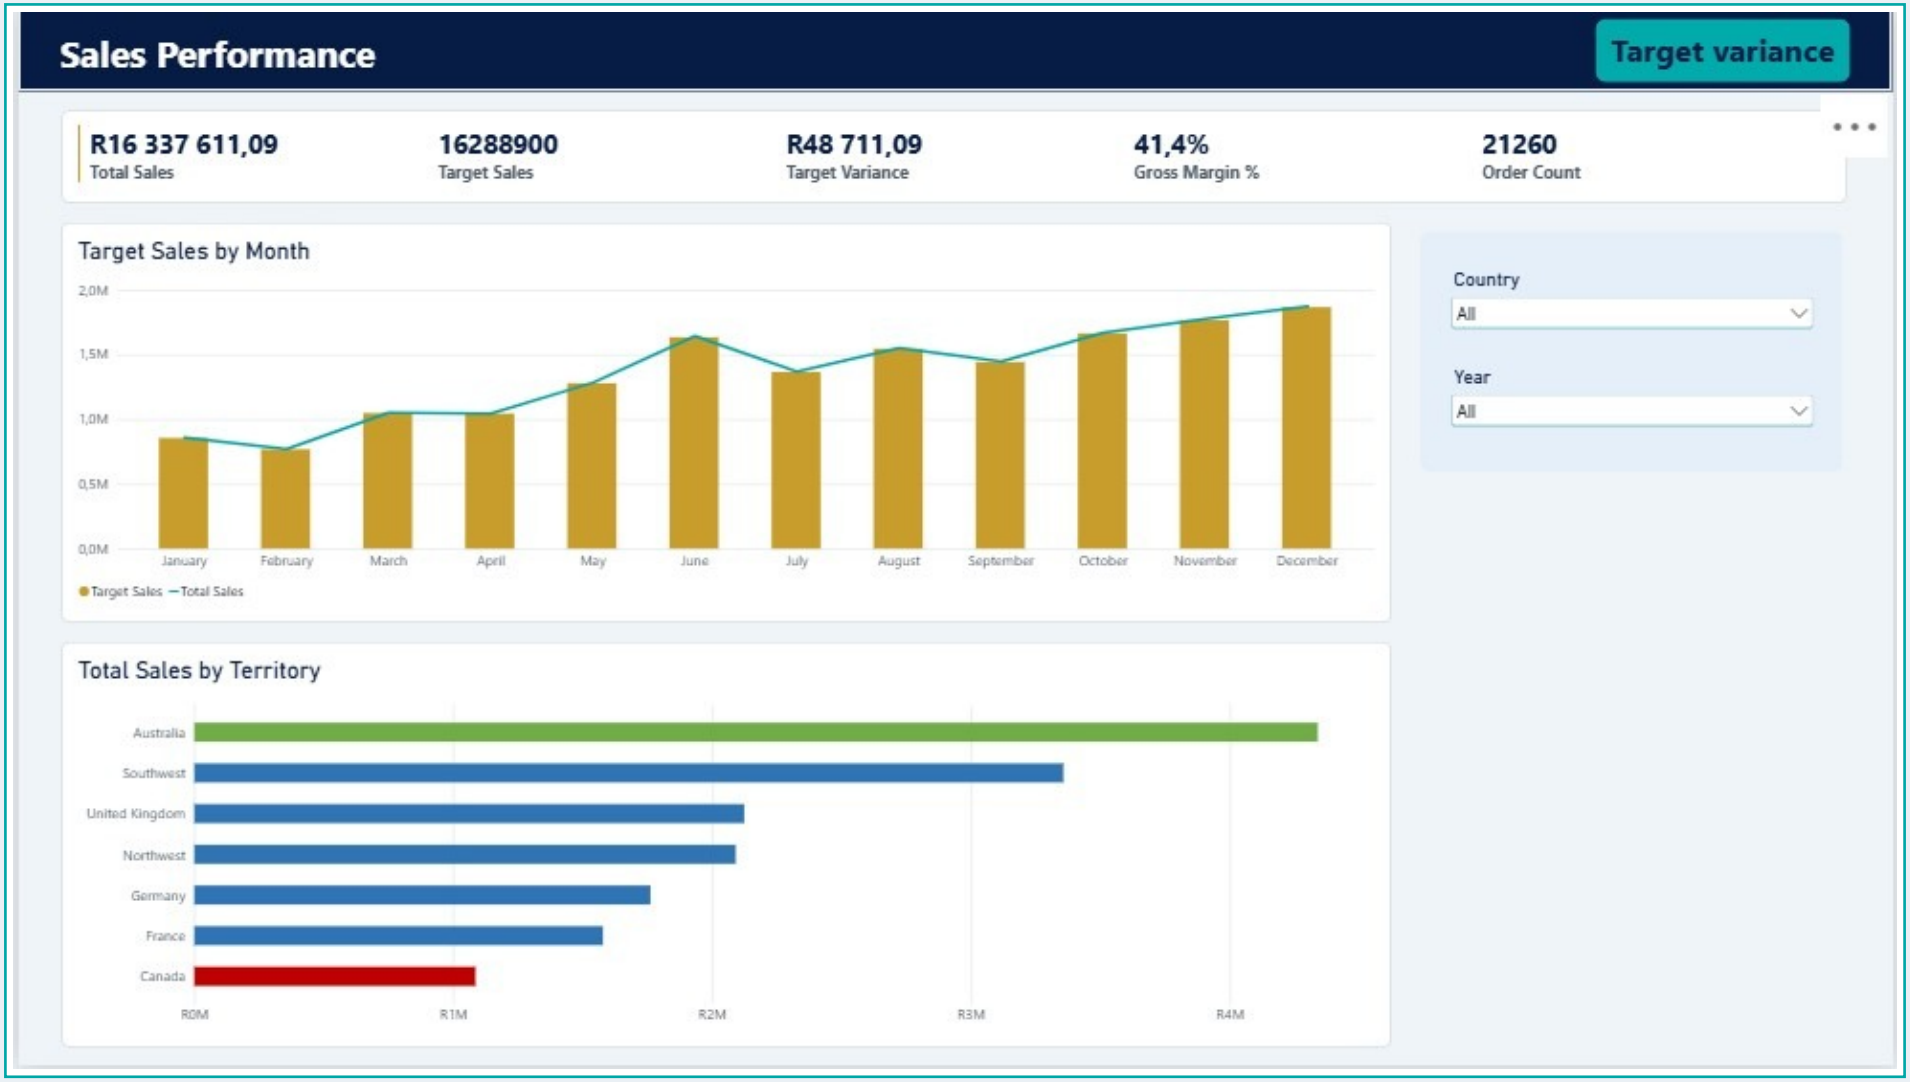

Result

Dynamic_Territory returns a different territory per user: Northwest, Australia and United Kingdom in the three tests.

5. Completed report page 1: Executive performance overview

Group 1 | Adventure Works Retail | 2013 Online Sales, Targets and Customer Value

KPI cards, monthly Sales vs Target, territory comparison and slicers.

Category table, target variance by territory and regional variance matrix.
